EXTERNAL SPECIFICATIONS
The QUADRA Combination series are constructed from durable extruded aluminum. The QUADRA Combination comes standard with a white baked powder coat finish. Available in custom epoxybased powder coat finishes (please specify). Universal mounting pattern and key hole slots are stamped into the backplate. Standard external LED status indicators and push button test switch. Heads are molded from high impact thermoplastic in a matching colour; SR PAR18 standard.

INTERNAL SPECIFICATIONS
SELF-POWERED: Standard versions use a valve regulated, sealed lead-acid battery to provide the emergency lighting duration as specified per unit. LED standard 120/347V input. If an AC generator is used to back up the signs, a surge suppression device is recommended to protect the entire emergency circuit.

BATTERY TECHNOLOGY
Designed with a maintenance free, valve regulated sealed lead-acid battery providing emergency lighting duration as specified per unit. Recharge time of the battery is 24 hours.

SUPPLEMENTAL TEXT
A running man sign with supplementary "EXIT" or "SORTIE" text is also available in the QUADRA model. To designate "EXIT" add "-E" to the end of the pictogram nomenclature, for "SORTIE" add "-S". For example, a sign with supplementary "EXIT" text and the indicator down to the right would have "DR-E" as it's pictogram nomenclature.
