

Sanitation Listed

A Sanitation Listed product is required to service the food industry's rigorous sanitation standards. BeLuce is pleased to meet the needs of this environment with the highest rating available for emergency lighting products - "Splash Zone".

In addition, the Sanitation Listing indicates that BeLuce's production site conforms to a range of compliance measures and is subject to a periodic regimen of follow-up inspections to verify continued conformance. A Sanitation Listing logo on our product indicates that our equipment is fit for use in the production of food intended for human consumption.

BeLuce brings you a selection of products which are now available with a "sanitation listed" label for food service markets to meet splash zone. The new Intertek ETL sanitation listed label conforms to ANSI/NSF standard no. 2 and is standard on the following products:
